BRUNO MANZANO

AI Engineer at Deloitte

+34 691343186 brunomanzanoclotet@gmail.com LinkedIn Portfolio Barcelona

SUMMARY

As an AI Engineer, I am passionate about seeking new opportunities to apply my knowledge and skills. With a strong interest in technology and its transformative potential, I strive to stay at the forefront of advancements in the field. While I am interested in many areas of the sector, my primary focus and enjoyment lie in Artificial Intelligence and Data Science.

EXPERIENCE

AI Engineer

Deloitte

09/2025 - Present Barcelona, Spain

Collaborating with the T&T Artificial Intelligence team, I build autonomous AI Agents and partner closely with clients to translate business requirements into technical reality. Through continuous feedback loops and iterative refinement, I help transition solutions from proof-of-concepts to high-value, production-ready Agentic workflows.

Machine Learning Engineer

CTTI - Centre de Telecomunicacions i Tecnologies de la Informació

10/2024 - 09/2025 L'Hospitalet de Llobregat, Spain

As a Machine Learning Engineer at CTTI, I develop AI-driven solutions to predict code defects, identify vulnerabilities, and automate test case generation. My role includes implementing tools for automatic problem detection in production environments and building predictive models to anticipate system failures. I collaborate across teams, offering technical expertise, and contribute to improving processes through machine learning-based innovations.

AI Engineer

Raona

06/2024 - 08/2024 Barcelona, Spain

- Developed and deployed machine learning models tailored to client-specific business challenges, enhancing operational efficiency.
- Designed NLP systems that highly improved client engagement.
- Maintained AI infrastructures, ensuring high availability and performance across various applications.

AI Engineer Intern

Raona

10/2023 - 06/2024 Barcelona, Spain

- Developed AI software solutions tailored for diverse client needs, enhancing operational efficiency.
- Engineered a document classifier for Cellnex using BERT, successfully categorizing over 3 million documents.
- Collaborated with cross-functional teams to ensure seamless integration of AI technologies.

PROJECTS

de-warp
01/2026 - Present Barcelona, Spain
Real-time AI voice agent on Gemini + LangChain Deep Agents with persistent knowledge graph memory (<500 ms latency). Deep research engine with 5 parallel sub-agents. Built with Gemini Live API, FastAPI, React 19, Supabase/pgvector.
de-warp.com

Knowledge Graph Powered AI Agents
01/2026 - Present Barcelona, Spain
Transform unstructured data into interactive knowledge graphs. Ask questions. Get answers grounded in your data.
